Protect Your Website & Your Customers Today

You may have seen lots of sites marked as SECURE and some marked as **NOT SECURE** / **NOT SECURE** as well as sites marked with an ⓘ – meaning some elements of the site are not secure.

Chrome 60 will be released on 26th July 2017 and your website will display as NOT SECURE. This will affect millions of sites and many will lose traffic and sales as a result.

To address the widely anticipated fall-out from this major change, and the distrust of Symantec Certificates, we have partnered with Entrust to fix this issue.

We can now protect your site with the correct certificate ahead of all compliance and browser deadlines.

WHICH WEB BROWSERS WILL BE AFFECTED?

The significance of this new DV SSL Certificate cannot be overstated:

1. It flags your sites as SECURE in the browser.
2. It costs £50 for 12 months.
3. It is the only DV SSL to have approved Anti-fraud checks carried-out on the Site Owner.
4. It is issued in minutes.
5. Our installers will install it on your behalf for £50.

GDPR Compliance & You

New General Data Protection Regulations legislation, and associated compliance requirements, have driven the leading web browsers to make significant changes in highlighting how seriously you take your customers' online data protection ahead of the May 2018 GDPR deadline. Non-compliance will lead to £multi-million fines.

With fines of £17m or more looming for those who don't take these matters seriously, we strongly advise that you get your online sites & services checked today for gaps in Data Protection.

To ensure you do not run the risk of substantial fines, or of complaints from Customers, Partners or Employees, we have launched a simple effective process to issue and install certificates.

Tough penalties: fines of up to **4%** of annual global revenue or **€20 million,** whichever is **greater.**

Obtaining consent for processing personal data must be clear, and must seek an affirmative response.

Data subjects have the **right to be forgotten** and erased from records.

Parental consent is required for the processing of personal data of children under age 16.

SSL CERTIFICATE LIFE CYCLE

DISCOVER · AUDIT · PROCURE · ISSUE · MANAGE · MONITOR · REMEDIATE
